Total		847	-3,498

On December 21, 1999 Statistics Canada released revised population estimates from July 1, 1996 to the present. New methodologies were introduced for two components: emigrants and returning emigrants (previously called Returning Canadians). Revisions were also made to the number of non-permanent residents, especially for 1999. In addition, Statistics Canada also introduced another component into the population estimates series, Canadians temporarily abroad.

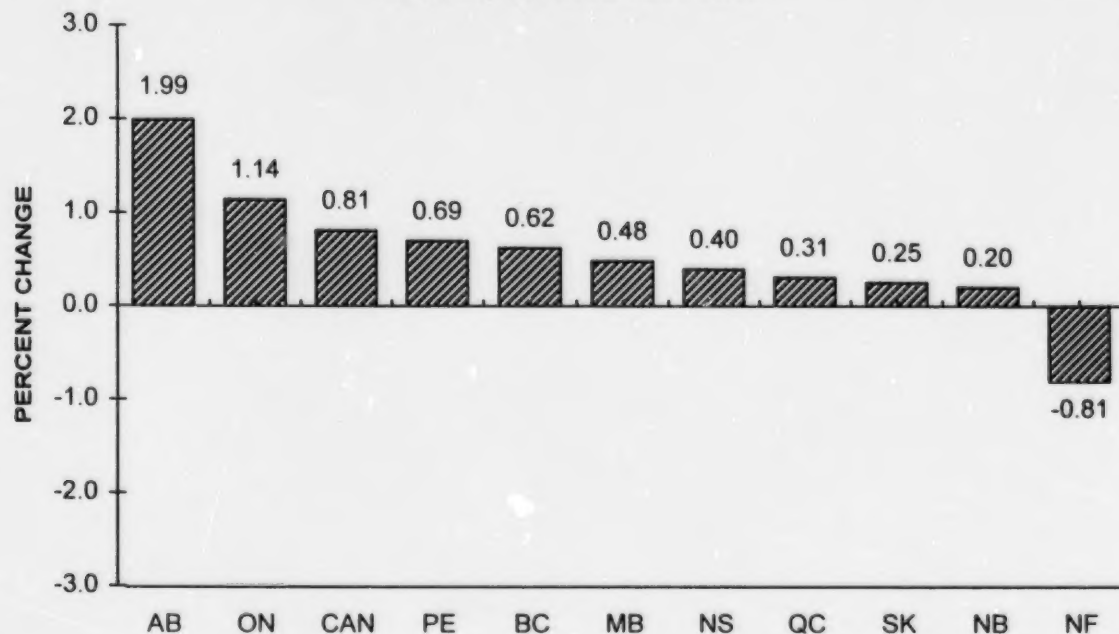

These revisions changed the data for the last three Census years in Tables 1 and 2 of this report. The new component, Canadians temporarily abroad, was included in the MBS "Other" column on Table 1 along with non-permanent residents and returning emigrants. As a result of this revision and others, population estimates were also affected and the appropriate adjustments were made in Tables 1 and 2.

This report replaces the Annual Population Statistics Report dated October 7, 1999.
